Paulene Mendiola

AI AUTOMATION & APPLICATION SUPPORT SPECIALIST

paulenemendiola0510@gmail.com +63 961-453-6075 paulene-mendiola.github.io/pm-portfolio-ai-sysad/

PROFESSIONAL SUMMARY

Technical Support and Customer Operations Specialist with 8+ years of BPO experience supporting SaaS applications, VoIP and communication platforms, CRM systems, and business users. Hands-on project experience building AI-powered business workflows, including Zoho CRM lead management and qualification, sales pipeline and follow-up automation, business reporting dashboards, smart email routing, and an AI-powered support assistant. Skilled in troubleshooting, workflow testing, system configuration, technical documentation, and customer support. Combines practical automation projects with structured problem-solving and a strong customer service background to support reliable business systems and improve operational workflows.

PROFESSIONAL EXPERIENCE

AI Automation Specialist | Part-Time

2025-Present

Confidential Sales Company

- Developed a Zoho CRM lead management and qualification system to organize sales leads and support a more structured qualification process.
- Built AI-powered business reporting and analytics dashboards to help visualize sales activity, monitor key performance indicators (KPIs), and support data-driven decisions.
- Created sales pipeline and follow-up automations to streamline lead tracking, improve follow-up consistency, and support cold-calling operations.
- Designed workflow processes to reduce repetitive manual tasks and improve visibility across lead management and sales activities.
- Documented and showcased permitted project demonstrations in a personal portfolio while maintaining client confidentiality.

Independent Contractor | System Administration & Business Systems

2025–Present | Independent Projects

Confidential Small Business Client

- Designed and developed a business website to establish an online presence and support customer interactions.
- Set up a customer support ticket management system to organize incoming inquiries, track issues, and improve support workflows.
- Developed a smart email routing system to organize incoming messages and direct inquiries according to defined criteria.
- Built an AI-powered support assistant to help handle customer inquiries and streamline routine support tasks.
- Configured and tested business workflows, troubleshooting issues and refining system functionality to meet operational needs.
- Documented system features and prepared portfolio demonstrations while respecting client confidentiality.

RingCentral — Technical Support Representative

2024–2025

VoIP Systems Support & Administration

- Troubleshot VoIP and SaaS communication issues involving account access, call connectivity, audio quality, and service functionality.
- Assisted with IVR, call-flow, and call-routing configuration to support proper communication workflows.
- Investigated technical incidents, identified potential root causes, and resolved issues or escalated complex cases.
- Documented troubleshooting steps, case updates, and resolutions to maintain accurate support records.
- Followed established troubleshooting procedures and service-level agreements (SLAs).
- Conducted customer follow-ups and service check-ins to identify recurring issues and improve customer satisfaction.
- Resolved 30+ technical cases daily while maintaining a 95% CSAT score.

PROFESSIONAL EXPERIENCE

TDCX — Chat Customer Support Specialist
2023–2024

Meta Business Support

- Supported business customers using Meta Business products and tools through chat-based technical support.
- Investigated account, advertising, platform, Meta Ads Manager, and Meta Pixel concerns and provided appropriate troubleshooting guidance.
- Managed multiple customer conversations while maintaining accuracy, service quality, and established support procedures.
- Escalated complex cases requiring specialized investigation and maintained detailed customer records.

WNS — Customer Service Representative
2020-2023

- Handled 50+ customer interactions daily across phone, chat, and email for account, billing, service, and product concerns.
- Used CRM systems to document customer interactions, update account information, and maintain accurate records.
- Maintained a 95% customer satisfaction score and contributed to a 25% increase in upsell revenue, as reported in the original resume.
- Helped retain at-risk customers through needs assessment, clear communication, and tailored solutions.

Alorica — Customer Service Representative
2017-2019

T-Mobile

- Managed 50+ daily customer interactions through phone, chat, and email while resolving account and service concerns.
- Documented customer interactions, maintained CRM records, and followed troubleshooting and escalation procedures.
- Recommended relevant products and services based on customer needs, contributing to a 25% increase in upsell revenue, as reported in the original resume.
